

THE DeMOSS COMPANY

October 28, 2003

Mr. Jack Martin - President
JBI Electrical Systems, Inc.
5705 Azle Avenue
Fort Worth, Texas 76114

Project: Casa Mañana Theater

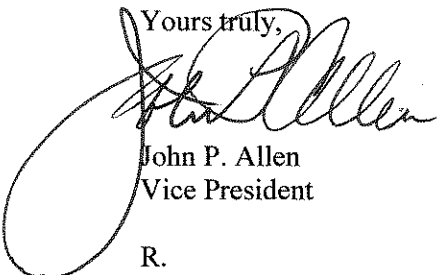

Dear Jack,

On behalf of The DeMoss Company I would like to thank your firm for the outstanding work that it performed on the Casa Mañana Project. JBI worked with us up front to do a preliminary bid, with no guarantee of the job, and then won the job in a competitive bid situation. JBI Electrical Systems, Inc. then stepped in and performed up to the expectations that we have come to know your firm can deliver.

The team of Gary Dalrymple, Charlie Marquis and Jason Stone did a very good job. Gary did a good job in the estimating department at the front of the project and during the bidding process. Charlie did a great job as PM, helping us keep the job on track. When asked to send us a revised price, or research an electrical issue, he responded quickly. Charlie was very supportive of the schedule and worked well with Buddy, Jason and me to iron out any problems that were in the field. Your field foreman, Jason Stone, was a real good fit for this job. We were impressed in the way he immersed himself into the details of the project and his interaction with others on the job. Without the help of this team from JBI Electrical Systems, Inc. the project would not have come together as quickly as it did.

Your team's strong management skills, support of the field, and the dedication shown by the field personnel helped to make this a fine project for both Casa Mañana Musicals, Inc. and The City of Fort Worth. We could not have experienced the high level of success on this job without the tremendous efforts of you and your staff.

Yours truly,

John P. Allen
Vice President

R.
